Safety Awareness Course (Guidance Note 913)

The Petroleum Industry Contractors Association of W.A. (PICA WA) has been instrumental in producing a number of guidance notes relating to best and safest practices in procedures for all facets of petroleum product, handling and storage. PICA WA will be delivering safety awareness courses for new and existing employees who work in the Petroleum Industry and also for any employees, contractors or individuals who are exposed to the storage and handling of petroleum products as part of their work duties.

Who should attend

The course is designed for persons about to join or currently working in the Petroleum Industry as well as any people in any industry who are responsible for the handling and storage of flammable or combustible liquids as part of their work duties.

You will learn

- How to implement the principles and practice of safety technology
- Apply factors relating to people, equipment, materials and the working environment to the establishment of safe working environments
- Identify and reporting of hazards and incidents

Topics covered include:

- Petroleum industry product knowledge
- Specific safety culture and understanding of hazards
- Handling and managing fuel storage safely
- Understanding of Static Electricity
- Awareness of Material Safety Data Sheets and their content
- Knowledge of Environmental Protection
- Work place Health and Safety in the petroleum industry
